

Hutch / shelving for storing overstock supplies idea development

TL;DR - If we make more storage space in
the bathroom...

- ...we can clear the shower out for other use (shower, silkscreen cleaning, trash can cleaning.
- ...we can separate some supplies that are clustered in the black cabinet - cleaning vs kitchen supplies
- ...we can store overstock of stuff in the small set of drawers: narcans, menstrual products

Current setup

Hutch version

Would be lovely in wood, but wire shelving would be expedient.

Discussion from [6/21 facilities meeting](#)

Toilet wall is 47"

Maybe better to run along the longer 53" wall

12" wire shelf experiment

Tried with a 12" deep shelf we had, and it's too close to someone using the toilet. 6 or 8" might work, or a wall mounted shelf instead of floor.

What to do

Full wall wire shelving

Chrome Wire Shelving with 4 Shelves - 8"d x 48"w x 96"h (SC084896-4) \$222.89

<https://www.shelving.com/products/8d-x-48w-chrome-wire-shelving-w-4-shelves>

This would be a pretty full wall of 8" deep shelving. Would create a huge amount of space, but maybe change feel of room a lot.

How high would we want?

Could hold tons of cleaning supplies as well as a full case of TP

Wall mounted double wire shelf

Could also just buy an adjustable two shelf setup, would leave the floor clear, probably feel more open.

DIY / custom wooden shelving

Custom made wooden spans would probably be the best vibes.
