

Current focus is finalizing the infrastructure that will help:

- visibilize and distribute admin labor
- ease onboarding into admin roles / tasks
- make Tech / Comms role sustainable
- support WGs in the same way

Tasks Completed

- Deployed beta version of our new digital infrastructure
 - **open call for user testers from admin commitees (and WGs too).**
- calendar on <https://ridgewoodcommons.nyc/> now generated from google sheet.

Tasks in Progress

- <https://coopcloud.tech/> adopting their tools and building a relationship with their community
 - a community of values-aligned open-source developers and tech-cooperatives
 - our technical labor becomes a contribution to a free and open-source commons
 - in early talks of planning a workshop using Ridgewood Commons as a case study
 - "come see what we did, learn how we did it, and learn how to *help us* do it"
- Working w sunday dinner increase onboarding opportunities with dinner announcements configuration
- Initial conversations with working groups about public-facing onboarding materials

Future Tasks

- Somebody has to send out a newsletter (124 pending subscribers).
- Have a meeting
- Onboard new members to admin committee
- Clarify purpose of the inter-working-group chats: "how do I make an internal announcement?"
- Set up distributed encrypted backups with other community spaces around the country

Task Pitches

- help write an inaugural newsletter?
- user testing on our infrastructure
- figure out an organized way to handle IG DMs
- research <https://garagehq.deuxfleurs.fr/>

Pain Point

- Our charter is far broader than our capacity allows
- No-one is doing the important work of improving our internal communication
