RC-Spokes & Group Updates@

Monthly updates on spokes process, proposals, WG updates

WG updates will probably be like pulling teeth, so would benefit from a process like:

JMP # is registered to signal, messages from groups can be forwarded to @RCUpdates.1312, forwarded messages undergo light editing, also can take direct text messages with more edited content. Reminder to please not get upset at editors!

RC-Newsletter@

Quarterly or Bi-annual broad updates on recent events and upcoming efforts, with feature sections for high promo events

- Type: Handmade announce-only
- Schedule: Quarterly or bi-annual
- Footer: About blurb, onboarding & support pitch, link to other lists and socials.

RC-community@ / RC-Mutual-Aid@

Kinda like ridgewood comunized but with delineated terms of use?

Begging for disaster

- Type: Discussion, possibly with moderation?
- Schedule: Chaos
- Footer: Site link

Automation

Ideally some content would be automatically generated from calendar or site feeds.

In drupal/backdrop, it'd be possible for events to be tagged as "feature" such that they get ingested differently, including an image.

I think it's nice to include some personality. Could be boring like we make a list of 52 little phrases or quotes.

Non-automation

All lists including handmade content will obviously require work, and might not be sustainable.
