

- Need for financial outline/update: For morale, for strategizing. (~LP)
 - A lot of people are just super in the dark, and in the dark narratives take shape. Might be useful to broadcast a general outline of the next few months "tick-tock," demonstrating how it's being planned for, and to that extent, plugging in to related organizing.
- Need for social media strategizing (~LP)
 - Coordinated content boosting: e.g. identify events and postings that make sense for people to repost and link.
 - Similar for story content: Take advantage of entire org, funnel content from sub-IGs up to main and even out to bluesky/mastadon.
 - Cohere around some blurbs/copy.
 - Organizational vacancy around this strategizing.
- Need for in space signage (~LP)
 - Create larger format, more attractive signage to inform visitors about space and needs. The \$ plant is great, but probably should be more "front facing" material, e.g. on actual front door, attached to board by hatch. In longer term, possibly extra-large signage about steel pantry shelving?
- Need for clarification & documentation of spokes and comms structures (~LP)
 - The spokes explainer and related info is *available*, but sometimes long, confusing, or scattered: i.e. the tempo of meetings was recently asked about in comms channels, should be front and center.
 - Action idea: wiki hacking meeting, to break up explainer either into pages or more easily navigated sections, triaging info.

I had just taken some notes the other day on the rc chats that exist. dumping that here: -p

- **rc admin collective:** day-to-day coordination between admin point people
- **rc spokescouncil chat:** inter-working group communication. open to WG delegates and bottom-liners
- **rc spokescouncil announcements:** announcements related to spokescouncil meetings (seems to be more broad now?)
- **rc community announcements:** announcements for wider community for stuff related to or aligned with the space.

Petty cash:

Dora bottomlining establishment/management

Possible changes to reimbursement form (maybe an option for petty payout?)

Cancelling BK rot Saving \$50-100/month

Smaller bags + signage

Gavin wiki login for copy dev campaign style

"Onboarding and comms" hack-day re: signal chats and wiki pages
